

The Matrix Letter

Contributions

To connect ASMB researchers with each other, based on their research focus or their approach, we call on the membership to contribute to the newsletter. We are currently focused on three different formats - these are great ways for young trainees to gain writing experience.

Matrix Mini-reviews

The Matrix Mini-review feature will be a focused summary the contribution of a particular lab (yours) in the context of the current state of knowledge in that held. Usually written by students, postdoctoral fellows or young faculty, the mini-review runs a single written page, with a single scientific illustration and a lab photo, and less than 10 references.

Matrix Essays

The purpose of a Matrix Essay is to promote a new or breaking hypothesis in the field of Matrix biology, with the expressed purpose of garnering supporting evidence and collaborators from the greater ASMB membership. Matrix essays are one running page and may include a single illustration and up to 10 references.

Letters to the Editor

A letter to the editor should be short and succinct, and will focus on alerting the ASMB membership to recent advances or concerns in our, and related fields. A letter to the editor is limited to 200 words and three references.

Plus...

Matrix Images

These are submissions of particularly beautiful (subjective!) images that you are willing to share with the membership, along with a caption explaining the image.

The Matrix Letter is published three times a year. Look for submission deadlines for the next issue on the ASMB home page.
