

Tissue, Matrix, and Pathobiology is an exciting new multidisciplinary and collaborative joint meeting of the <u>American Society for Matrix Biology</u> (ASMB), <u>The Histochemical Society</u> (HCS), and the <u>American Society for Investigative Pathology</u> (ASIP). The Program Committee has put together a fantastic four-day lineup of speakers, career sessions, workshops, and events—and can't wait to welcome you in Salt Lake City!

Who Should Attend

Students, trainees, investigators, and educators who are working on cutting-edge basic, clinical, and translational research related to biology of cells and tissues, as well as molecular and cellular alterations that drive disease processes.

Scientific Programming

The scientific program includes award lectures, plenary sessions, symposia, and workshops featuring speakers who are leaders in their respective fields of study. Thematic highlights include:

- Extracellular Matrix Biology
- Liver Pathobiology
- Cardiovascular Diseases
- ECM Receptors
- Pathobiology of Fibrosis
- Cancer Pathobiology
- Matrix Disorders
- Neuropathology
- Organoid Models of Disease
- Mechanobiology
- Inflammatory and Infectious diseases
- Cell-Matrix Interactions

The meeting will also feature education and career development sessions that are focused on the needs of the current generation of trainees and young investigators. A generous scholar award program will provide travel grants for trainees and junior faculty who are members of the participating Societies. View the <u>full program</u>.
